

WAE Field and 3D committee report

For the WAE congress 2022

In 2021 two European championships were arranged successfully. 3D championship 29 August – 4 September in Maribor, Slovenia and WAE field championship 5-12 September in Poreč, Croatia. In 2022 there are no WAE field or 3D championships, but WA 3D championship are planned to be held in September Terni, Italy.

Under the year the committee has had seven online calls but was unable to arrange an official meeting in person. The committee intends to have one in the autumn of 2022. Our main subjects in discussions this year have been to investigate the possibility to organize a seminar with the focus in field and 3D. As we see it there are a couple of groups that could benefit of that kind of event e.g., organizer and judges (as in 2019). A plan was made for a workshop and its content but unfortunately the project was cancelled. There is now a suggestion that the judge seminar this autumn will be combined with some of the parts we planned with the focus on field and 3D.

Field and 3D committee
